**Description of the site:**

The quiet community of Creston is located south of Kootenay Lake in the heart of the Rockies region in southeast British Columbia. The Creston Valley is a breathtaking combination of snow-capped mountain peaks, fields of grain, deep clear lakes and wide-open spaces. Blessed with a temperate climate, Creston is a year-round playground for people who love the outdoors. Recreational opportunities include golfing, boating, hiking, biking, fishing, cross-country skiing and snowmobiling. Larger urban centers, and world class alpine skiing in BC, Alberta and the US are all accessible by car.
